

Grip-Tight, Textured Screen Printing

Now available for production, Silgan proudly introduces a new printing technology which allows a bottle to be screen printed with a grip texture ink. Through the use of conventional screens we can apply this material to achieve varying grip patterns onto your container. The texture can be printed over ink or directly to the bottle. The grip texture is useful in the shower, at the beach or in any other high moisture area. Silgan is capable of printing this grip ink at our Norcross, Seymour, Ligonier, Port Clinton, Deep River and Penn Yan locations.
