

Bi-Color Bottles

Silgan Plastics has introduced a line of co-extruded bi-colored high-density polyethylene (HDPE) bottles. Formed on Silgan's proprietary wheel equipment, these bottles can be produced in a wide variety of bottle sizes, neck finishes and shapes, including rounds, ovals and flat-sided shapes.

Silgan offers a full range of color choices, and the two colors can be introduced as stripes of equal or varying width. In an oval bottle, for example, the stripes can be limited only to the broader sides, while in a round bottle two stripes can create a half-and-half configuration

These eye-catching bottles will be ideal for delivering high-energy shelf presence in retail packaging, for cosmetic and personal care products, for example. They also offer a colorful packaging choice for promotional items, since they can be formed using school, club or organizational colors.
