

## Ace 5000 Shrink Sleeve Decorating Equipment

Now installed for production, Silgan proudly introduces our Ace 5000 shrink sleeve decorating equipment. Purchased for the Commercial Development Center in Norcross, Georgia, this production machine is available for sampling shrink decorated bottles at speeds of 200 pieces per minute.

The benefit to having this production equipment set up and running in Norcross has two advantages, one to manufacture test market samples and the other is to be proactive in supplying our customers. We can shorten startup times for new products that require shrink decoration by shipping this existing equipment to any manufacturing location that requires this capability.

For more information on Silgan's decoration capabilities, please contact Tim Monacella at 770-243-5260.
