

PET PCR

Improve your product sustainability rating. Products manufactured from PCR require fewer natural resources compared to virgin resin and are still recyclable which makes them an eco-friendly option.

- + Easily recyclable, PET can be used repeatedly and replaces the usage of virgin resin.
- + According to the EPA data, recycled plastics account for far less environmental impact than their virgin counterparts.
- + Production of recycled resin uses 90% less energy and emits 78% less greenhouse gases than virgin resin.
- + Silgan Plastics currently produces bottles with up to 100% PET PCR in a monolayer application.
- + We offer both food grade and non-food grade PET PCR options, depending on your need.
- + Silgan Plastics currently sources PET PCR from multiple qualified sources.
- + We also work closely with customers to help them meet regulatory or OEM preferred sustainability initiative goals.

For more information on these or other stock & mold available bottles and jars, please contact your Silgan Plastics account manager or visit [SilganPlastics.com](https://www.SilganPlastics.com)
