At Silgan Plastics, we're passionate about solving problems. We specialize in manufacturing custom packaging solutions to fit the unique needs of markets ranging from personal care to food storage. We have multiple Commercial Development Centers across North America staffed with experienced product engineers and cutting edge molding technology. From market and product research to conceptual design and patenting, Silgan Plastics can help boost your brand and take your packaging to the next level.

We pride ourselves on delivering innovative solutions for all your plastic manufacturing needs. Whether you seek one of our existing designs or a custom packaging solution, our team of experts is here to help. Explore our wide range of offerings and discover how Silgan Plastics can help your business thrive in today's market.

From mono-layer PET and HDPE bottles to multi-layer configurations with PCR and nylon, the possibilities are endless. While Silgan Plastics stocks a variety of our most popular items, we also have an extensive selection of mold-available bottles, jars and closures. These allow you to get to market quickly while managing costs. Many of our mold available bottles are available to customers who normally purchase in quantities of 100,000 or more. The lead times can vary (usually between 4-6 weeks) and the payment terms are net 30 days upon credit approval.

Mold-Available

sample available: *

contract distributor stock program

We carry over 100 stock items produced at various Silgan Plastics locations throughout the country. These high-demand items are available for quick shipment to our Contract Distributors.

No special resins, colorants, packaging, labeling, certification or shipping configurations are permitted for stock shipments. If any of the foregoing is required, orders must be placed as custom orders and be subject to minimum production run quantities and current lead times. Minimum stock bottle order varies by plant and bottle size. Items at one location may be combined to reach the minimum.

LIGONIER, IN

PHONE: 260-894-7900

Maximum stock order quantity per item is 100K bottles. Exceptions will be made based on review of existing inventory and may have to be scheduled as a production order. The minimum stock orders is based on bottle size, but a \$500 minimum is still required

- Smaller than 4 oz = 1 carton
- 4 oz but less than 32 oz = 6 cartons

Ligonier stock bottles are floor loaded and string tied, not stretch wrapped. Bottles can be shipped on pallets only if specified on customer's purchase order. A pallet charge will apply.

HOUSTON, TX

PHONE: 713-644-5201

Bettix stock program. Minimum order is \$1,000. Maximum stock order quantity per item is 25K bottles. Exceptions will be made based on review of existing inventory and may have to be scheduled as a production order.

Silgan Plastics has shaped brands and built partnerships with many of today's leading food packaging companies. From condiment bottles to candy jars, we have the capabilities to provide the right packaging solution. A partnership with us ensures exceptional service, quality, reliability and an elevated product that will stand out on retail store shelves.

Looking for the perfect package for your product? Silgan Plastics' large selection of high-quality jars and bottles can help your brand take shape. These select PET items available for quick shipment from our Penn Yan, New York facility. Silgan Plastics has over 125 high-quality items, with 17 items available in order quantities as low as one case. Contact one of our Customer Service Associates for further details at 315.536.5690.

Penn Yan Stock

BOSTON ROUNDS

Not only does Silgan Plastics have an extensive selection of mold available items, many of the PET items are stocked on the floor at our Penn Yan, NY facility and are available for quick shipment.

While many product lines in this offering were created specifically for the personal care market, you'll find them perfectly suited for the healthcare and household markets as well. Whatever your distinct need, you'll be satisfied with our high-quality resins, state-of-the-art processing techniques, in-house decorating and quality assurance programs. Contact one of our Customer Service Associates for further details at 315.536.5690.

COLOR

We know our existing mold available bottles and jars cannot fit every project. That's why we are continually expanding our product offering through new stock packaging and innovative custom solutions. Our team approach to custom product development ensures that each product will be built to your specifications on time and within budget.

Silgan Plastics has cultivated some of the strongest customer relationships with leading automotive and home care supply companies. Our extensive multilayer experience allows us to be your trusted advisor on meeting your packaging needs. Our design teams can create unique packaging solutions to give your product differentiation from your competitors.

Critical to every package is how it is sealed — and we can seal it for you. Silgan Plastics specializes in both single and multi-piece dispensing and non-dispensing closures and fitments for the food and spice markets. We’re also quite proud of our ability to manufacture custom, injection-molded plastic closures and related components to the most detailed, exacting standards and offer you complete packaging options.

Companies turn to Silgan for our expertise and innovation in meeting their packaging needs. From a simple twist-off plastic closure to custom fitments and sifters — our goal is not only to make your product stand out, but to save you time, money and of course, increase your bottom line. That’s why our design and technology engineers are continuously working to develop new packaging solutions and improve existing ones.

Of course, we’re not just bottles.

CREATIVE DESIGN SERVICES

At Silgan Plastics, we develop inventive packaging concepts through a collaborative design process. We offer speed to market with a full range of in-house value added services. By merging aesthetics with functionality, we craft ideas that enhance product visibility and consumer engagement. Whether revitalizing traditional packaging or pioneering new formats, we drive concept development from initial sketches to commercial bottles.

We prioritize sustainability in every design decision. Our team carefully selects recyclable materials, explores eco-friendly alternatives, and works towards minimizing waste. Integrating sustainable practices into your product designs will help you better align with consumer values and work towards a greener future. Great design begins with thorough research.

The consumer packaged goods market is constantly evolving, which is why you need access to the latest consumer trends, product innovation, market sizing and strategic insight. We monitor trends from around the world to understand what is driving your customers next purchase decision. We incorporate what we learn into our design process in order to give your product differentiation in a competitive market.

Our in-depth trend analysis is just the start of the design process.

There are a few key things that we take into consideration in the design of any package - environmental considerations, shelf appeal, performance & manufacturability of package. Material selection, weight reduction, and cube optimization are all factors that we consider as we look to provide a sustainable solution. When it comes to shelf appeal, we work to design concepts that will stand out amongst the competition. From color selection, to shape and labeling, many things help contribute to a products differentiation.

Not only does a package have to look great and appeal to customers, it has to perform. Ergonomics and user-friendliness along with functionality and stability are all considered in our initial design ideations.

One thing we won't do is design a package that is not manufacturable. We make sure that things like top load, assembly, filling and decorating are all taken into the overall design of a package. We want to make sure that once we have worked with you to develop the concept, the package can go into production with out any roadblocks.

Conceptualizing and sketching are key elements in the creative design process.

At the core of our creative design process lies the art of conceptualization and sketching. Our approach involves close collaboration with clients, allowing us to create customized package designs. Through a an interplay of ideas, we create sketches and concepts that not only reflect consumer preferences but also remain in tune with market trends.

Once the selection of concepts is narrowed down to one or two designs, we'll further develop your product using Siemens NX. This sophisticated three-dimensional engineering software program allows us to detail your product's NECK, final shape, capacity and label area.

We can then create photo-realistic renderings for your review. Siemens NX 3D files can be used to create mold geometry resulting in faster product launches.

We all know the saying "a picture is worth a thousand words", well we like to say that "a model is worth a thousand pictures". From a dimensionally correct Siemens NX digital file, Silgan can create an FDM model using one of our in-house 3-D printers. We can even paint or decorate your package with a printed label to replicate silkscreen printing, heat transfer, in-mold or pressure sensitive labeling. This will give you a full size representation of your product, transforming concept into reality

Silgan Plastics' Creative Design Services personnel continually evaluate current in-market and cutting edge technologies. Take advantage of our highly trained professionals who are available to support your packaging projects with their technical expertise.

Looking for something special?

COMMERCIAL DEVELOPMENT

Silgan Plastics' Commercial Development

personnel stay up to date in the latest material developments. As your trusted advisor, we continually evaluate new resins, colorants and additives, assessing the impact that these materials can have on the manufacturing process and performance of your package.

By conducting independent material performance analysis, Silgan Plastics can provide guidance on product interaction and shelf life, recycling guidelines, potential light weighting options and the impact of PCR usage.

Bottle Testing

Silgan Plastics' Metrology Lab also routinely completes bottle analysis to confirm conformance to dimensional and functional requirements. The lab is fully equipped to test all key attributes and dimensional characteristics of your package in order to provide a complete competitive package analysis. Our services include:

- Measurement of All Bottle Dimensions Including Neck ID
- Top Load Testing
- Drop Impact Testing
- Leak Testing and Pressure Vacuum
- Environmental Stress Crack Resistance (ESCR) Testing
- Application and Removal Torque
- Accelerated Product Compatibility Testing
- MVTR per USP <671>
- Oxygen Permeation Testing

Material Evaluations

- Material Identification
- Process-ability
- Recycle-ability, Sustainability
- Melt Flow Testing
- Contaminant Identification
- Oxygen Scavengers
- Plant Based Resins
- Layer Analysis for Projected Shelf Life

Package appearance and integrity are critical to consumer acceptance. At Silgan Plastics we provide color analysis, review opacity levels and can test the percentage of light transmission in the UV range for proper protection. When it comes to decorating, Silgan routinely tests Dyne levels for ink and label adhesion. Our lab also reviews label coefficient of friction and adhesive coat weight.

Regulatory Affairs

Our technical group stays current on industry regulatory requirements and takes a leading role with Silgan Plastics' regulatory affairs; from FDA compliance to maintenance of four US Drug Master Files and one Canadian Pharmaceutical Master File.

- Maintenance of Silgan Plastics' four DMF's and access letters
- Material FDA compliance
- RoHS and Coneg
- TSE/BSE
- Phthalate
- Latex free
- BPA

Silgan Plastics' Commercial Development personnel continually evaluate current in-market and cutting edge technologies. Take advantage of our highly trained professionals who are available to support your packaging projects with their technical expertise.

Our resources are focused on delivering rapid-to-market, cost effective, innovative packaging solutions.

SAMPLES

We have **hundreds of samples** of our bottles available for you, created in many materials, shapes and designs. You can choose from over 700 standard and specialty items. We will supply up to 24 samples per bottle type. Just let your Silgan Plastics representative know what you'd like.

BOTTLE VARIETY

Resin	PET, PP, HDPE, LDPE, PCR, Bio-Resin, Beach Plastic
Size	23cc to 2.25 gal
Color	White, Natural
Process	Injection Stretch Blow : 1-Step & 2-Step, Extrusion Blow : Shuttle & BDS*, Injection, Injection Blow, Multilayer, Co-Extrusion
Markets	Food, Liquor/Tobacco, Personal Care, Automotive, Specialty Beverage, Healthcare, Household/Industrial Chemical, Ag-Chem
Shape	Round, Oval, Oblong, Square, Tottle, Handleware

SPECIALTY ITEMS

Gloss, Co-Extrusion, Bi-layer, Grip Tight, Soft Touch, Window Stripe, Vertical Stripe

DECORATION

Silk Screen, Pressure Sensitive, Shrink Sleeve, In-Mold Label, Heat Transfer

To place an order for samples, please contact your Silgan Plastics Account Manager, Customer Service Representative or online at silganplastics.com/contact-us

Silgan Specialty Packaging specializes in plastic injection molding for major corporations across North America. Since our start in 1970, we've grown consistently over the years and now occupy a state-of-the-art 350,000 sq. ft. facility in metropolitan Milwaukee.

Our expertise includes in-house design of custom plastic product solutions as well as in-house tooling, mold construction, and all secondary operations from assembly to warehousing and distribution. We are recognized for our high-quality products, competitive prices, and on-time delivery.

We take great pride in our facilities, our people, and our commitment to quality — which includes official certification to the FSSC 22000 Standards for food safety and FDA compliance. In fact, while inspecting our facility, a global manufacturer commented that our entire operation was cleaner than most clean rooms.

THE DISPENSING SOLUTIONS PARTNER THAT IS COMMITTED TO DELIVERING
A BETTER EXPERIENCE

Silgan Dispensing Systems is a leading global supplier of highly engineered triggers, pumps, sprayers and dispensing closure solutions to major branded consumer goods product companies in the home, health and beauty markets.

With its breadth and depth of technology, consumer insights and manufacturing expertise, Silgan Dispensing provides innovative and customizable solutions that meet Brand owners’ needs. Whether the application calls for a pump, a sprayer or a custom dispensing device, Silgan Dispensing can tailor our wide-ranging and well-known product portfolio for our customers’ needs. As a leader in global dispensing solutions, Silgan Dispensing is committed to improving both customer experience and its partners’ businesses.

Key Technologies

- Trigger sprayers
- Hose-end sprayers & customer devices
- Aerosol actuators
- Pumps/dispensers
- Fragrance pumps
- Fine mist sprayers
- Airless & cosmetic pumps
- Healthcare pumps & sprayers
- Dispensing closures
- PCR products

End Markets

- Surface Care
- Air Care
- Lawn & Garden
- Fabric Care
- Bath & Body
- Skin Care
- Cosmetics
- Hair Care
- Fine Fragrance
- Healthcare – Ear, Nasal, Ophthalmic, Oral/Throat, Topical/ Dermal
